PROFILE

UX Designer with a background in healthcare, bringing a nurse's eye to identify pain points and producing results that are user-centered. Passionate about understanding the full user experience through research and finding innovative solutions.

SKILLS

Design: Information Architecture, Interface Design, Prototyping, Wireframing, User Flows, User Research
Research: User Interviews, Usability Testing, Persona Creation, User Journey Maps

TOOLS

Core UX Tools: Adobe Illustrator, Adobe Photoshop, Adobe XD, AfterEffects, Figma, Protopie, UXtweak
Additional Software Tools: Arduino, Cinema4d, Framer, P5.js, Reality Composer, Spline, Touch Designer, Webflow

ACADEMIC PROJECTS

Strava Mobile App Redesign
Mar 2026 - Apr 2026

- Led the end-to-end design process for a mobile fitness app, focusing on data transparency and making privacy settings more obvious and accessible.
- Analyzed insights from four user empathy interviews to inform design decisions.
- Crafted low-fidelity wireframes and high-fidelity prototypes using Figma; conducted guerrilla research to refine and enhance design quality.
- **Result:** Validated the new onboarding process through usability testing via a working prototype created in Figma, resulting in a 100% task success rate and high user satisfaction.

Hiking App Accessibility Redesign
Sep 2025 - Dec 2025

- Identified accessibility issues in a mobile hiking app through academic and user research, focusing on users with vision impairments and limited hand use.
- Developed user personas, journey maps, and wireframes from research, iteratively refining design through multiple rounds of user testing.
- Created a high-fidelity interactive prototype using Protopie to demonstrate a more accessible app.
- **Result:** Received positive feedback from users with physical limitations, who noted that improved button placement, higher colour contrast, and larger text size made navigation significantly easier.

WORK EXPERIENCE

Registered Nurse
Niagara Health | Niagara Region

Sep 2024 - Present

Niagara Health is a multi-site hospital network and regional healthcare provider serving approximately 450,000 residents across the Regional Municipality of Niagara in Ontario.

- Assessed and prioritized patient needs in a dynamic, high-pressure emergency department, managing care for 250 patients daily.
- Identified recurring friction points in patient wait times and implemented frequent patient check-ins, improving patient experience and alleviating stress throughout the care process.
- Communicated complex medical information effectively to diverse patient groups, ensuring clarity and comprehension.
- Worked collaboratively with multidisciplinary teams (physicians, specialists, and support staff) to coordinate patient care, enhancing communication and rapid problem-solving.
- Built trust-based relationships with patients over repeated visits, gathering qualitative insight into their concerns, behaviors, and pain points.

Registered Nurse

Jul 2023 - Aug 2024

Meridia Medical | Toronto, ON

Meridia Medical Group is a Toronto-based medical clinic specializing in gynecology and cosmetic dermatology.

- Conducted health history intake for over 30 patients daily and assisted with 5-6 procedures each day.
- Optimized clinic operations by resolving technical issues and managing supply inventory efficiently.
- Triaged 10-20 referrals/day and followed up with patients by phone to communicate lab results and care updates.

EDUCATION

Honours Bachelor of Interaction Design

Apr 2028

Sheridan College | Oakville, ON

GPA 3.6/4.0

Honours Bachelor of Nursing

Apr 2017

Brock University | St. Catharines, ON
